BEAT *the* **HEAT** *with* **MAXIMUM FRESHNESS**

**TIPS THAT WILL
HELP KEEP
YOUR PORTABLE
RESTROOMS
FRESH DURING
SUMMER HEAT.**

Why Is Odor More Challenging in Hot Weather?

As temperatures rise, odor challenges can increase.

- Higher temperatures accelerate waste activity
- Increased usage puts more demand on each unit
- Water evaporates faster in extreme heat

A summer service program often requires different strategies than cooler months.

TIP 1

Start With Proper Water Levels

Water plays a critical role in portable restroom performance.

- Helps maintain waste below the water line
- Allows deodorizer products to work effectively
- Helps reduce buildup and mounding

Add at least 5-8 gallons of water in the summer so waste doesn't break the water line

TIP 2

Match Your Deodorizer Program to Conditions

No two jobsites are exactly alike.

Factors to consider:

- Temperature
- Number of users
- Service frequency

Higher temperatures and heavier usage often require stronger odor control solutions to maintain performance between services.

TIP 3

Add Fragrance Enhancing products

Great odor control starts in the tank, but doesn't stop there.

Consider combining:

- Summer strength deodorizer
- Fragrance disk
- Urinal screen/block
- Fragrance spray

stacking products can help create a cleaner, fresher experience for customers and end users.

TIP 4

Pay Attention to High-Touch Areas

Not every odor issue starts in the holding tank.

Regular cleaning can help remove:

- Splashback residue
- Urinal buildup
- Dirt and grime on interior surfaces

Use a fragrance spray washdown cleaner and urinal cleaner on services to keep unit clean and control urine buildup

Stay Ahead of Summer Odor Challenges

- Add plenty of water in the tank
- Switch to summer strength deodorizers
- Add fragrance enhancers
- Regularly clean high touch areas and urine buildup
